- 24. 166.8 miles WSW of Kodiak, AK, Nov 26 2014 10:05:18, 11449964

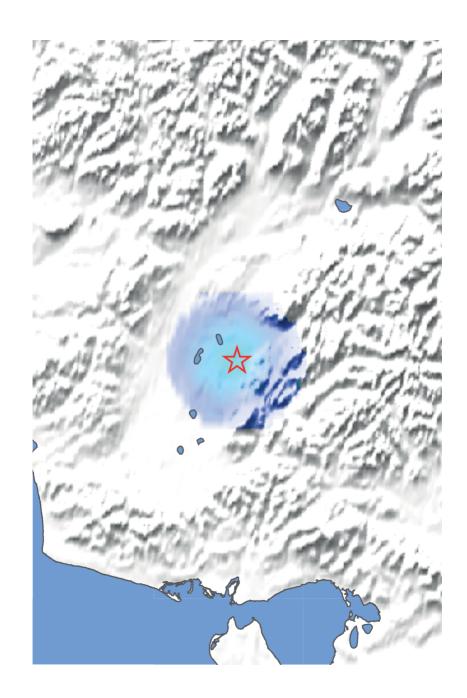

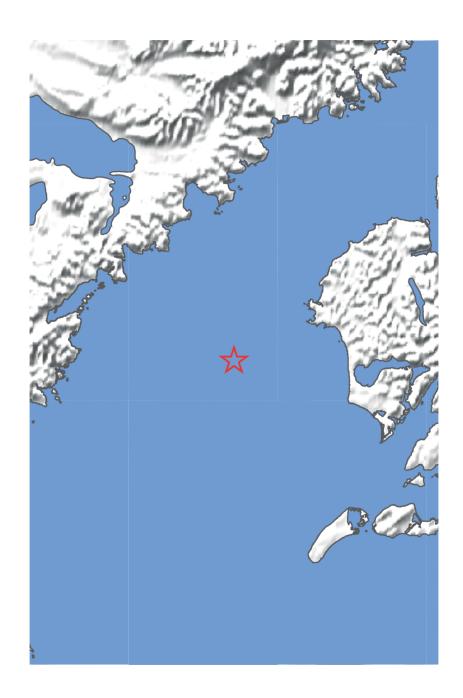

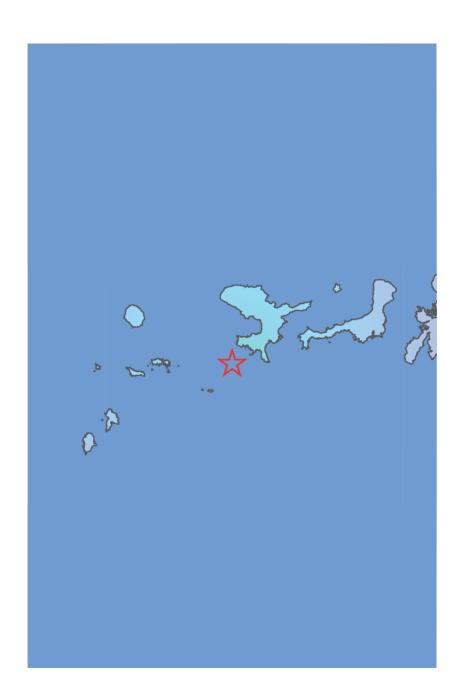

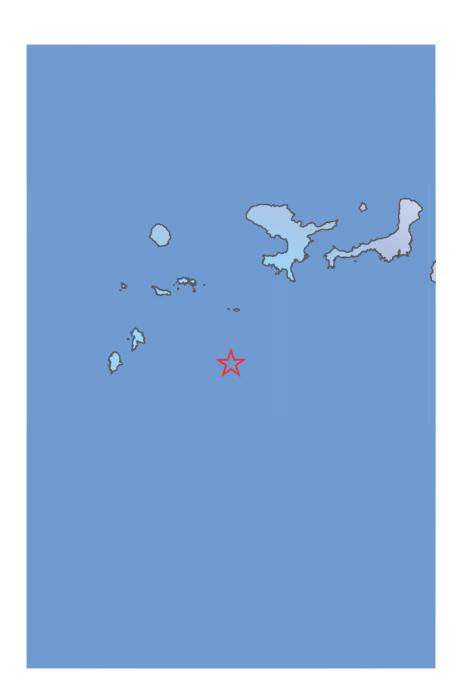

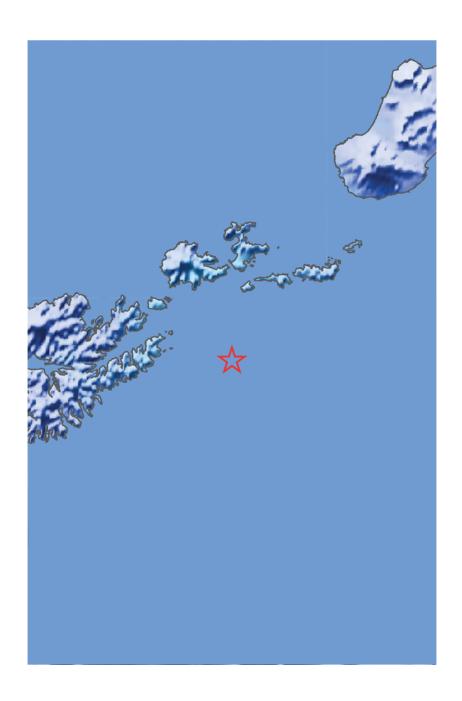

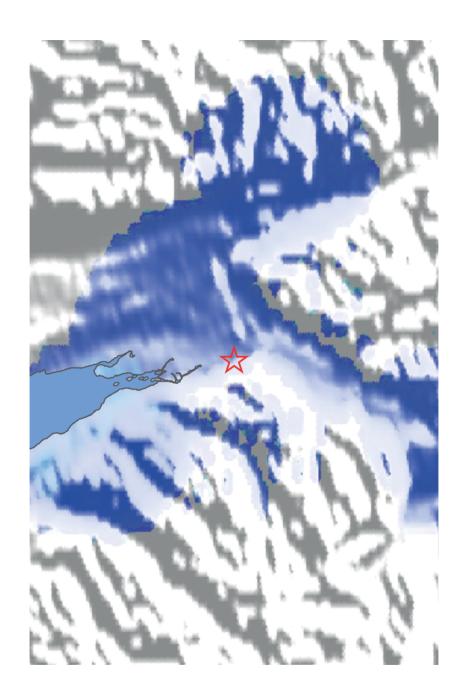

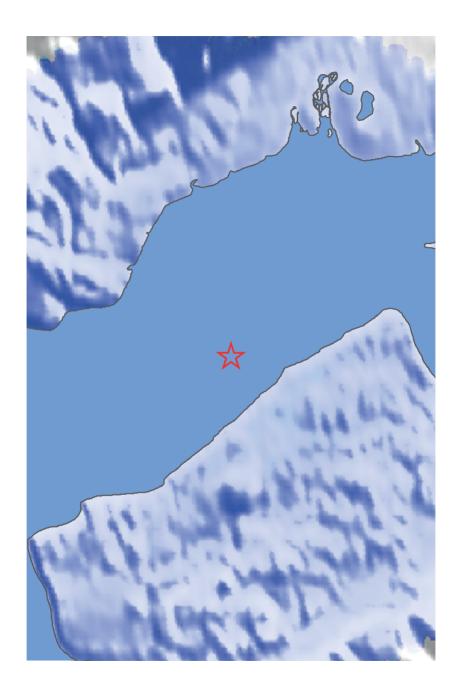

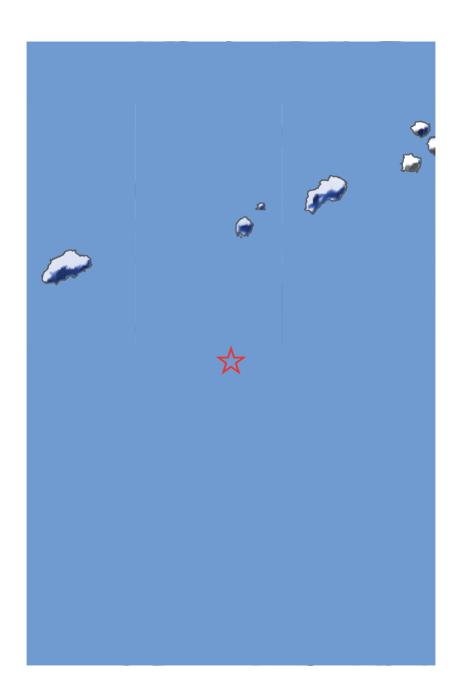

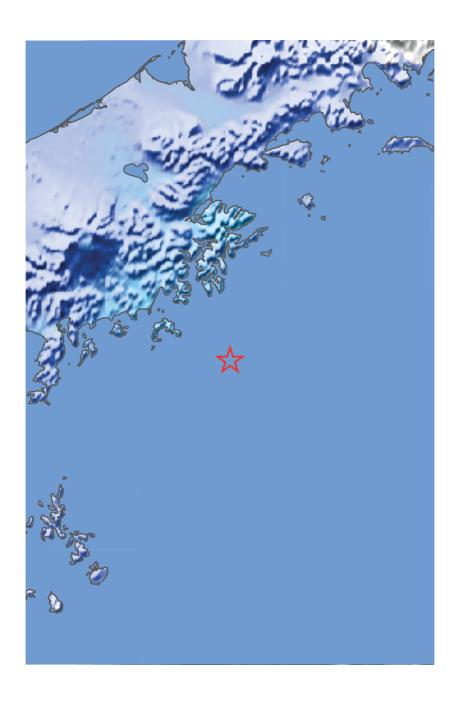

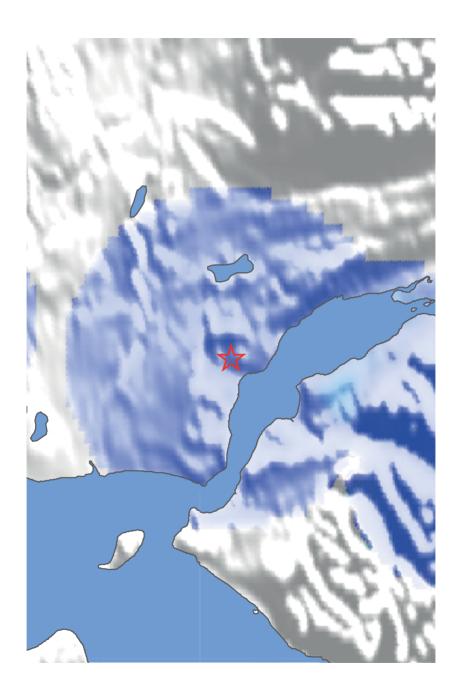

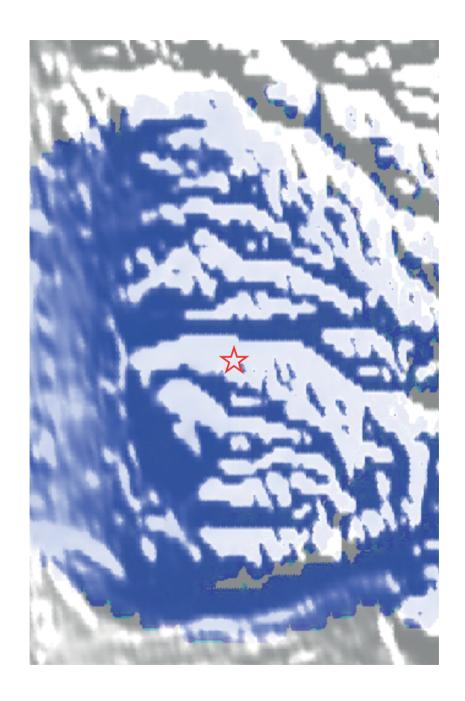

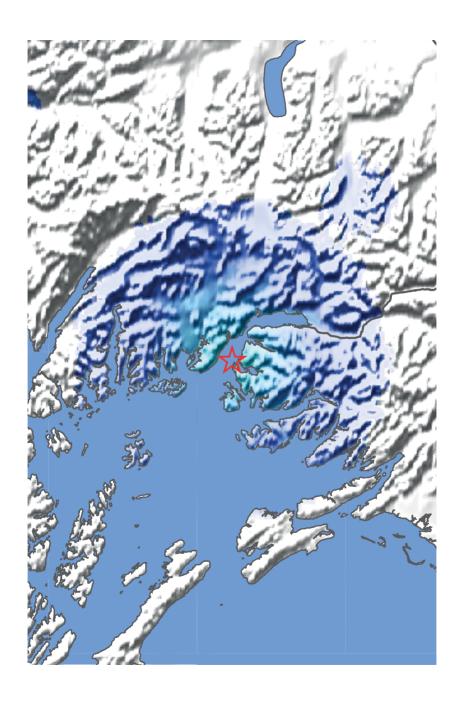

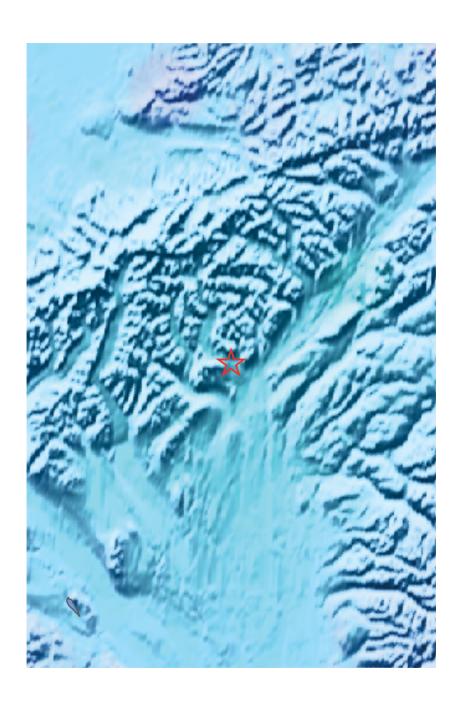

## TWENTY-FOUR RECENT ALASKAN EARTHQUAKES

Tremors that are low on the Richter scale might only be sensed by seismological recording equipment rather than be felt by humans. This book contains a collection of images that have been automatically generated from sensor data, and exist as automated representations of geological events that may never have been subjectively experienced.
